ACKNOWLEDGMENTS

Wrote Robert Lynd in 1959: “The great pleasure of ignorance is the pleasure of asking questions. The man who has lost this pleasure or exchanged it for the pleasure of dogma, which is the pleasure of answering, is already beginning to stiffen.” This author—mindful of Lynd’s cautions and happily learning more daily from the questions than from the answers—wishes to thank those who have so kindly provided both.

The author is grateful to the following teachers and their students for the questions they contributed to this volume: Mary Jane Davis, Red Bank Catholic High School, Red Bank, NJ; Tim Culp, Arroyo Grande High School, Arroyo Grande, CA; Jill Losee-Hoehlein, Great Bridge High School, Chesapeake, VA; and Mark Stephansky, Whitman-Hanson Regional High School, Whitman, MA. Thanks also to Kathy Frame of the National Association of Biology Teachers for making their involvement possible.

Sincere appreciation goes to Dr. Louis Bloomfield, Professor of Physics, University of Virginia, Charlottesville, and the author of *How Things Work: The Physics of Everyday Life*, for his assistance with water pumps.

The author greatly appreciates the thorough and thoughtful critical reviews prepared by Dr. Jack Davis, internist and cardiologist in private practice, Kalispell, Montana; and Dr. Upinderjit Sidhu, a physician in Weston, Connecticut.

Thanks also to perfusionists Debra Douglass and Bob Dyga for their in-depth interviews and to Pat Kaiser and Jennifer Fuller for arranging their involvement.

Special thanks, as always, to Amy Shields, for being the most supportive and positive editor a writer could hope for. And finally the deepest appreciation to those the author counts on most: Ann for her spirit, Tammy for her nurturing, and Lloyd for his patience, understanding, and unfailing good humor.

Keep those questions coming.
